***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a method for producing surfaces which have self-cleaning properties.

Group II, claim(s) 4-5, drawn to an article with self-cleaning surface.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature common to all the independent claims is hydrophobicized microparticles of claim 1, which is shown to be anticipated by Oles et al (US 20020150723). Oles et al describes particles having a particle diameter of 0.3-30 microns (See P17) that are hydrophobized with fluorosilanes such as perfluoroalkylsilanes (See P21). For these reasons the unity does not exist between the groups of claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
